

MATRIX SPEED BAR

Definition: The Speed Bar uses specific key words to search for listings, open house and agents in a single search field.

Location: The Speed Bar is available just below the menu bar on every Matrix screen. For a list of sample shortcuts, click on the grey question mark  to the left of the Speed Bar.

How to: Type the criteria into the Speed Bar search box and include a space after each criterion. To run the search, press the Enter key on your keyboard or click the magnifying glass icon  to the right of the Speed Bar search box.

Results: In the example above, we are searching for Active listings, single family homes, priced at \$500,000-\$600,000, three or more bedrooms, two or more bathrooms (always enter bedrooms before baths) in Reseda (you can use a zip code or area number).

Note: The search bar by default searches for Residential Listings unless you specify a different property type.
